#### CEO Juha Kalliokoski:

"During the first quarter, our revenue increased by 11.1%, totaling EUR 143.0 million.

Our company's international development was strong. In Sweden, we grew by 38.6% and our revenue totaled EUR 33.4 million, with Germany's corresponding figures at 66.6% and EUR 10.8 million.

In Finland, we grew by 4.7%, with our revenue totaling EUR 108.3 million. Although our growth was slightly slower than usual, we believe that we have further increased our market share in Finland. Our gross profit increased by 8.9% to EUR 13.5 million. Our operating profit in Finland was close to last year's level totaling EUR 5.9 million, since we invested in future growth.

Our profitability was close to last year's level, with our adjusted operating profit totaling EUR 4.7 million. Our gross profit was EUR 16.6 million (14.6) and gross profit margin increased to 11.6% (11.3). Due to investments in future growth operating profit margin decreased and was 3.2% (3.7). We invested as planned in Kamux's brand building, IT-systems and personnel, with a special focus on competence development and recruitment methods. We are working actively towards improving our profitability and turning the sales growth of like-for-like showrooms positive.

Public discussion around power sources picked up in Finland before the parliamentary election. Consumers' uncertainty affected used car sales, resulting in consumers postponing the purchase or trade of cars. However, the need for mobility has remained unchanged and Kamux's operating model works well despite the market situation, as evidenced by our results from the first quarter.

During the first quarter, we opened three new showrooms in Finland and two new showrooms in Sweden. In addition, we have announced the opening of four new showrooms.

We appointed Marko Lehtonen as the company's CFO and member of the Group's Management Team on March 14, 2019. Lehtonen will start in his new position on June 17, 2019 at the latest."

# Outlook and financial targets

Kamux does not provide a short-term outlook. The company's medium-term financial targets for 2019–2022 are to increase revenue by over 10% annually and to reach an operating profit margin of at least 4%.

#### Short-term risks and uncertainties

According to the company's assessment, there have not been any material changes in the short-term risks or uncertainties during the review period.

Kamux's revenue and operating profit have experienced strong growth in recent years. However, in the future, Kamux's revenue and operating profit may increase more slowly or decrease compared to the historical performance.

Kamux's rapid and strong growth and business expansion during the past few years have set new requirements for the scope and monitoring of internal guidelines and policies. Any failure in the implementation and monitoring of these guidelines or policies may lead to financial consequences for Kamux and weaken the company's reputation.

Kamux's geographical expansion involves several risks, and any failure in recognizing suitable cooperation partners, recruiting new employees or achieving estimated benefits from internationalization may have a material adverse effect on Kamux. Furthermore, the company's success will depend on, inter alia, the company's management and other skilled employees, as well as its ability to recruit, develop, train, motivate and retain skilled employees.

Kamux operates in the used car retail market, and uncertain general economic conditions in the countries in which Kamux operates may have an adverse effect on Kamux's business, financial position and results of operations.

Kamux operates in a competitive and fragmented used car market, and competition may increase in the future.

Changes in car tax legislation or preparation of legislation may have a material adverse effect on the sales of new and used cars and on Kamux. Kamux's tax burden could increase as a result of changes to tax laws or their application or as a result of a tax audit. Public discussion on car power sources and possible changes in power sources as well as political decisions related to power sources may seasonally have an effect on Kamux's business considering that the consumer demand may fluctuate.

Kamux believes that its brand and reputation among its customers are important for the company's success. Kamux's failure to maintain an adequate service level or an adverse event that damages the company's reputation may have a significant adverse effect on Kamux.

# Kamux Corporation's Interim Report for January-March 2019

# Key accounting policies

This Interim Report has been prepared according to the IAS 34 - Interim Financial Reporting standard. The Interim Report is based on the same accounting policies and calculation methods as used in the financial statements for the year 2018, as well as on the new and amended IFRS standards described in the financial statements for the year 2018. However, the Interim Report does not include all the information and notes that are presented in the Annual Financial Statements. As such, the Interim Report should be read together with the Annual Financial Statements for the year 2018. This Interim Report applies the same accounting principles as the consolidated financial statements, with the exception of the new and amended standards described below, adopted at the beginning of the financial year.

The figures presented in the Interim Report are independently rounded.

Preparing the Interim Report requires the management to make accounting estimates and judgments as well as assumptions that affect the application of the accounting principles and the carrying amounts of assets, liabilities, income and expenses. The actual outcomes may differ from these estimates and judgments. The most significant estimates made by the management relating to the group's accounting policies and uncertainties are the same as those applied in the financial statements for the year 2018.

The Interim Report is unaudited.

#### **IFRS 16 Leases**

IFRS 16 was effective for accounting periods beginning on or after January 1, 2019, and Kamux adopted the standard on its effective date. Kamux adopted IFRS 16 using the modified retrospective transition approach. Figures of comparative years are not restated but to retain the comparability between 2018 and 2019 figures, Kamux discloses additional information about the effects of IFRS 16 on 2019 figures.

In accordance with IFRS 16, Kamux recognizes almost all leases on the balance sheet. The standard removed the current distinction between operating and financing leases and requires recognition of an asset (the right to use the leased item) and a financial liability to pay rentals for virtually all lease contracts. Kamux applies an optional exemption that exists for short-term and low-value leases.

In IFRS 16 implementation project Kamux adjusted accounting processes to meet IFRS 16 requirements and improved controls. Kamux implemented a lease agreement administration and calculation system which was taken into use in the beginning of year 2019. The standard has a significant effect on Kamux's consolidated financial statements since Kamux has leased many showrooms and office premises from third parties for periods longer than one year and by cancellable contracts. The amount of leased assets and corresponding lease liabilities increased the consolidated balance sheet total by 33% or EUR 38.3 million at the date of transition January 1, 2019. Kamux has prepared a preliminary assessment of the total effects of adopting the IFRS 16 standard in its consolidated financial statements for 2019. Kamux expects that during 2019, key figures based on balance sheet will change. During 2019, the change will also have effect on Kamux's statement of comprehensive income because in the new method, the total expense is typically higher in the earlier years of a lease and lower in later years. Additionally, lease payment in operating expenses is replaced with interest and depreciation, and consequently key figures such as EBITDA and operating profit changes. Kamux currently estimates that the adoption of IFRS 16 is expected to improve significantly EBITDA but is not expected to have a significant impact on operating profit in year 2019.
